

Mitigate Risk Through Effective Pipeline Integrity Management

NACE PIMS Latin America

November 15-17, 2017 | Lima, Peru | JW Marriott Lima

Utilizing Pipeline integrity management can help mitigate risk, increase safety, environmental protection, reliable service, and maximize profits for distribution of oil, gas, and refined hydrocarbons. Join pipeline operators and integrity service providers at the NACE Pipeline Integrity Management Seminar (PIMS) Latin America, to discover how to implement and improve your pipeline integrity. The event will feature presentations on the following topics:

- Inline inspection
- Pipeline integrity management using risk models
- Risk analysis software
- Pipeline integrity management and treats monitoring in real time
- Data integration in risk models
- Direct external and internal assessment of pipelines
- Geotechnical treats
- Third party damage
- Corrosion monitoring and control
- Internal corrosion prediction models
- Pipeline repair and new technologies
